

TECHNICAL DATA SHEET

Description

FIBRAN^{geo} SI-080 is a natural fibrous material produced by minerals like Basalt, Limestone, Dolomite, and Bauxite. FIBRAN^{geo} SI-080 has the shape of a trapezoid, in order to fill the trapezoidal parts of a metal profile. FIBRAN^{geo} SI-080 are chemical inert, their attributes are maintained constant in time and do not allow the growth of parasites.

Dimensions

Length 1000 mm

Technical Characteristics

Properties	Unit	Value	DIN / EN
Density (ρ)	Kg / m ³	80	
Thermal conductivity	W/mK	0.040	
Diffusion resistance factor (μ)	-	1	DIN 52615

Packaging

Pallet of 600 pieces

Instructions for use

HANDLING AND STORAGE

FIBRAN^{geo} B products should be stored indoors. If stored outdoors, they must be protected from impregnation. Pallets shrink-wrapped weather tightly in PE film may be stored outside. Separate packages should be placed on a flat pallet, not in direct contact with the ground. If part of the product gets wet, it must be dried before installation. Stonewool dries quickly and its insulating properties remain unchanged after drying. FIBRAN^{geo} B products are chemically inert and do not allow the growth of micro-organisms, insects or rodents. Handling, loading and unloading of the products should be carried out with care, to avoid damage both of the packaging and the boards' edges.

APPLICATION AND PERSONAL PROTECTION

For the selection and application of FIBRAN^{geo} B products all design requirements should be taken into consideration. FIBRAN^{geo} B products should be protected from impregnation, prior to and during application. The packaging film should be removed with care just before installation. Working areas should be kept clean. Unnecessary or extensive contact of the skin and eyes with product off-cuts, fibres and dust should be avoided, and protective wear should be used (gloves, goggles, hats). Sufficient ventilation of the working areas should be ensured, whilst power cutting tools should always be provided with a mechanical system of dust intake. Stone wool products are not considered hazardous waste. Waste disposal should be carried out according to State and Local regulations.
